of the

Immaculate Conception

New Orleans

Fifty-Fourth Year

THE COLLEGE of the Immaculate Conception, conducted by the Fathers of the Society of Jesus, was founded in December 1847; and in March, 1856, was endowed by the Legislature of the State of Louisiana, with the full powers and privileges of a University.

The plan of studies embraces the Doctrines and Evidences of the Catholic Religion, Logic, Metaphysics, Ethics, Astronomy, Natural Philosophy, Chemistry, Mathematics, Rhetoric, Composition, Elocution, History, Geography, Arithmetic, Penmanship, Book-keeping, Stenography, Typewriting, the Latin, Greek, English, French, German and Spanish Languages. The arrangement of these studies is as follows:

I.

Post-Graduate Course

The Post-Graduate Course of Lectures was introduced in the month of November, 1886, and it has since been continued with good results.

Sociology, Natural and International Law, Political Economy and General Physics are the subject-matter of the Lectures.

The Annual Course opens on the first Monday of October and closes at the end of April. The general subject-matter will be distributed over several years, so as to vary the treatises of those who may desire to attend for more than one term.

At the termination of the complete Course, such members of the class as have given satisfaction by regular attendance may apply for the Degree of Bachelor of Philosophy, which will be granted on condition that they pass an examination on Theses, to be selected from the matter developed during the Course, and present an original and creditable paper on a given subject.

The Degree of **A. M.** will be bestowed after one term of Post-Graduate Lectures, faithfully and studiously attended, on those who have previously received the Degree of **A. B.**

Graduates of the College, or of any College of the same grade, students of Law or Medicine, and gentlemen of literary or scientific culture, will be admitted to the above Course.

II.

Classical Course

The Classical Course, which leads to the Degree of Bachelor of Arts, is designed to impart a thorough, liberal education. In the accomplishment of this purpose, the Ancient Classics hold the first place, because some acquaintance with them is essential to the study of modern literature and to sound scholarship. Besides Latin, Greek and English, it embraces Religious Instruction, Mental and Moral Philosophy, Astronomy and Mathematics, History, Literature, Book-Keeping, and the Natural Sciences. It has been found by long experience that this is the only Course that affords unsurpassed mental discipline, forms a correct taste, and prepares the student to excel in any pursuit, whether professional or commercial.

III.

Commercial Course

This Course offers the means of acquiring a good English or Commercial education. It embraces Book-Keeping, a thorough study of Arithmetic, Algebra, Grammar, Style, practice in Composition, English, and Religious Instruction. At the

end of the Course, a Commercial Certificate is awarded to those who pass a satisfactory examination. Moreover, the Degree of Bachelor of Science will be conferred upon those who successfully devote two extra years to the study of Literature, Philosophy and the Natural Sciences.

IV.

Preparatory Department

This Department comprises the First and Second Preparatory. Its object is to introduce the younger pupils to the study of the first principles of Grammar, chiefly by class-drill; to form them to habits of attention and application, and thus prepare them for one of the regular Courses of Instruction.

Requirements for entering this Department are:

First.—The applicant must know how to read, write and spell creditably.

Second.—He should know Arithmetic as far as Long Division, included.

Military Department

The students form a Cadet Battalion known as the Jesuit College Cadet Corps.

The Cadets enrolled in the Battalions contract no obligation to be called upon for military service, either by the State or the General Government.

The officers are selected from the Cadets most distinguished for soldierly bearing, good conduct and proficiency in drill and tactics.

The uniform adopted is the regulation West Point fatigue uniform. It can be worn at all times so that it is not necessary to be provided with two outfits of clothing.

The instruction in the Department is both practical and theoretical.

The practical instruction, which all students must attend is two hours per week and consists principally of the instruction prescribed by the Infantry Drill Regulations of the U. S. Army.

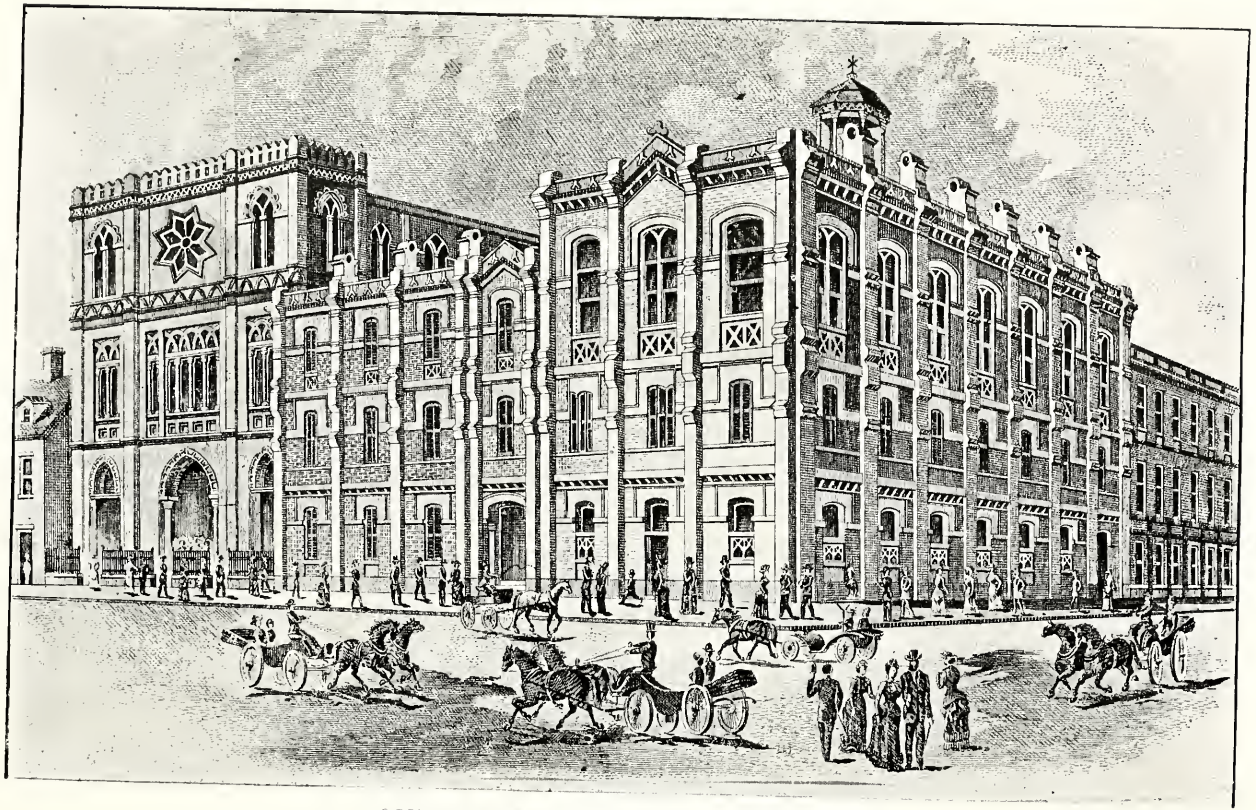
The theoretical instruction is limited to the students of the graduating class. It consists of a short course of lectures by the Military Professor on Discipline, Military Hygiene, Military History and kindred subjects.

The time given to the Military Department will not in any way interfere with the usual college curriculum. *(1).

*1. At the enthusiastic reception tendered the late President McKinley, on his Southern tour, by the City of New Orleans, the Jesuit College cadets appeared to very great advantage and were singularly honored by being requested to act as a special guard of honor to His Excellency the President of the United States on the occasion of his visit to the historic Cabildo.

Religious Training

The College authorities are convinced that, without Religion, there can be no education, in the true sense of the word, that is to say, no complete and harmonious development of the intellect and heart of man. They hold, furthermore, that religious truth, being definite and certain, like any and every other truth, is as susceptible of teaching as the science of language, or the theory of numbers. Hence, the Catechism of Christian Doctrine is a text-book in every class, and lectures on it are given twice a week. In all the classes the day's work begins and ends with prayer. The Catholic Religion alone is taught, but non-Catholics will also be welcome and their religious opinions studiously respected. Catholic students go to Confession the third Saturday of each month, then on the following Sunday, in the Church annexed to the College, hear Mass and receive Holy Communion.



CHURCH AND COLLEGE, 1882—1900

General Regulations

Admission

VERY Student who applies for admission must furnish testimonials of good moral character, unless he be personally known to some member of the faculty; and should he come from another institution, he will be required to bring satisfactory evidence of blameless conduct. He is then examined by the Prefect of Studies, and assigned to that class for which his previous attainments have qualified him.

The session is divided into two terms. The first begins on the first Monday in September, the second on the first of February and closes towards the end of June.

Leaving the College

Parents who wish to withdraw their sons before the end of the session are respectfully requested to give due notice of their intention to the Vice-President. Many inconveniences will thus be avoided, and order secured. Should any student leave of his own accord, or be withdrawn without such notice, or without giving satisfactory reasons, he will not be re-admitted. On leaving, students should take their books, etc., with them, as the College is not responsible for any articles left behind.

Examinations

Two examinations are held every year, one at the end of each term.

Promotions

Though promotions may take place any time during the year, whenever warranted by the progress of the student, the usual time is the beginning of the school year. These promotions depend partly on the final examinations, but mainly on the general class standing during the preceding year. A student of ordinary talent, and steady application during the entire session, may be easily promoted, provided he returns promptly when classes are resumed. Should he not be promoted, it is usually a sign that he did not attend regularly during the entire session, or that he did not devote sufficient time daily to home study. Should a student fail in the final examination, he will be offered the privilege of passing a private examination during the vacation, if his yearly average warrants the concession.

Competitions

Competitive exercises are given monthly in the various branches, the results being read publicly in the presence of the faculty and students, and the leaders rewarded for their proficiency.

To lend interest to these announcements, as well as to accustom the students to appear in public, the proceedings are varied with declamations, original speeches, vocal and instrumental music.

Testimonials of good conduct and diligence are given regularly to deserving students. Parents should require these evidences of good behavior, and if not forthcoming, take an early opportunity of visiting the Vice-President, to inquire why their sons fail to receive merit cards.

Modern Languages

The study of French, Spanish and German is optional and entails no extra charge.

Stenography and Typewriting

The study of these branches is optional.

Fees and Expenses

As the College is not endowed, it is entirely dependent for its support on the fees paid for tuition.

Tuition per month, payable in advance	$6 00
Use of Chemicals, etc., *per annum*	10 00
Classical Diploma	10 00
Commercial Certificate	5 00
Stenography and Typewriting, each, per month	1 00

N. B.—No deduction is made for any absence less than half a month.

Books and stationery are furnished by the College at current prices.

Special Regulations

THE ATTENTION of students is specially directed to the important duty of **home study.** Since recitations in the various branches fill up almost all the school hours, it is very difficult to advance, and utterly impossible to accomplish the work laid out for each year, unless the student devotes at least **three hours daily** to class study at home. Parents are exhorted to insist on this indispensable duty, and to inform the faculty, should their sons neglect it.

Home Study

After home study the next duty which should claim the attention of students and the vigilance of parents is punctuality. Severe illness or absence from the city is, generally speaking, the only excuse admissible for staying away. Whenever parents keep their sons at home, on account of sickness or for any other good reason, they are requested to send a postal card to the **Vice-President.** Frequent absence so rapidly lowers a student's class standing, that the faculty prefer he should be withdrawn entirely.

Punctuality

Owing, moreover, to the serious inconvenience resulting to professors and students from breaking in on class-hours by withdrawal before the end of the afternoon class, permission to leave College will not be given, unless for reasons deemed imperative by the Vice-President.

Attendance the whole day

If parents do not insist on home study and punctual attendance, they need not be astonished if their sons remain a second year in the same class, or, perhaps, be refused re-admission.

Along with moral and mental training, the faculty lay great stress on the development of the manners of perfect gentlemen, and consider the rules of politeness a very important part of the course of studies. Whatever, therefore, is contrary to good breeding, is out of place in College. Consequently no boisterous conduct or rough play is tolerated

COLLEGE OF THE IMMACULATE CONCEPTION
COMMON STREET FRONT

Politeness

on the premises, and silence is strictly enjoined in the class-rooms, and on the corridors or stairways leading thereto. Any ungentlemanly conduct among the students themselves, any disrespect or insubordination to a professor or officer of the College, will be visited with severe punishment, and even with dismissal should the gravity of the offense require such a penalty.

For faults of ordinary occurrence, such as tardy arrival, failure in exercises or recitations, slight violations of rules; detention after class, or the task of writing or memorizing some lines from an author, is deemed a sufficient penalty.

Penalties

For faults committed outside of the premises, the officers of the College are by no means responsible, as students cease, then, to be under their jurisdiction: still should any serious charge be fairly substantiated, the guilty will be punished according to the gravity of the offense.

Damages to the College property will be repaired at the expense of the offender.

The use of profane language or anything bordering on immorality, will subject the offender to immediate expulsion.

Monthly Marks

Once a month the marks of all the students are read out in the classes. These marks are the record of daily lessons, exercises, conduct and monthly competitions. 100 is the maximum. A student receiving over 89, merits a testimonial of the first grade, one receiving from 80 to 89, merits one of the second grade.

Monthly Reports

A report of these marks is sent by mail to the home of every student to be signed by his parents or guardian. As these reports indicate exactly the student's class standing, the College requests that they be very carefully examined, and afterwards returned to the Professor. No student is allowed to open his report.

Tardiness

The College is open at 8 A. M. All are obliged to be present at 8:45 A. M., at which hour they go to church for morning prayer. Class begins precisely at 9 o'clock. A student arriving after the 8:45 o'clock bell has rung, must

report at once to the Vice-President, and cannot enter class without a note from him.

Written excuses for Lessons

Written excuses for lessons or exercises fall under the same rule as notes for absence; a student not prepared to recite is considered as morally absent, and is marked accordingly. Such excuses are to be handed to the Prefect of Studies, who will decide whether, in some special instance, they are to be admitted.

Luncheon

No student, unless for serious reasons, will be allowed to take his lunch outside the College limits. Parents are requested not to ask this permission if it can be possibly avoided.

Recreation

Thursday is the weekly holiday, but should an extraordinary holiday fall on Tuesday, Wednesday, or Friday, classes may be continued on Thursday, as usual.

Dress

All are expected to be clean and neat in person and apparel.

Mental Philosophy

Logic

Natural and artificial.

Artificial logic: dialectics, criteriology.

Dialectics: apprehensions of the mind, or ideas. Classification of ideas.

Judgments,—different kinds of.

Propositions,—quantity and quality of.

Reasoning: the Syllogism; its constituent parts; its laws; various forms of the Syllogism.

Sophisms,—methods of detecting.

Argumentation: Demonstration; analytical and synthetical demonstration; relative merits of both systems.

Criteriology

1. A mere apprehension, considered as such, cannot be false.
2. Certainty is within the reach of mankind.
3. Universal scepticism, philosophically considered, is absurd. Its absurdity, however, is incapable of rigorous logical demonstration without "begging the question."
4. The system of methodical doubt formulated by Descartes, as the only safe method of arriving at truth, is self-contradictory, and as such to be repudiated.
5. Every judgment of the mind which is immediate or analytical, is essentially true, and furnishes infallible motives of certainty.

6. Every logical conclusion, the result of premises formally and materially true, furnishes us with infallible motives of certainty.
7. Our external senses as witnesses of objective truth, are reliable, provided the required conditions are satisfied.
8. The evidence of objective truth, is the final or ultimate motive of certainty.

Ontology

1. The term "being" as predicated of God and of creatures is analogous.
2. The internal possibility of beings is not formally dependent on the omnipotence or on the will of God.
3. The possibility of beings depends formally, on the intellect, fundamentally, on the essence of God.
4. Every action has some definite end or purpose.
5. God, as the first cause is capable of maintaining certain accidents separated from the substance in which they should naturally inhere.

Cosmology

1. Pantheism and Agnosticism, as systems of philosophy, are in themselves destructive of morality, of religion, and consequently of human society.
2. The world, as well as its constituent elements, is not self-existent, and consequently was created.
3. The world is relatively, though not absolutely, perfect.
4. The extrinsic glory of God is the primary motive of the world's existence.
5. Miracles are possible.
6. The substantial constituents of every material being are matter and form; its prime matter being the principle of its extension, its substantial form the principle of its specific action.

Psychology

1. Brute animals, though endowed with sensitive perception and instinct, are incapable of attaining intellectual knowledge.
2. The will of man, in its present state, is free, not only from all coercive force, but also from all necessary action.
3. The human soul is essentially a simple being.
4. The human soul is a spiritual substance.
5. The human soul is immortal.

Natural Theology

1. There exists a necessary and essentially self-existent being, the intelligent cause of the world and the Supreme Lawgiver, to Whom all men are responsible for their moral conduct.
2. This being, whom we call God, is infinitely perfect.
3. There is but one God.
4. God is intrinsically unchangeable.
5. God knows all things possible, actual and conditional.
6. In His external acts God is essentially free.
7. God is all powerful.
8. God's Providence directs every event.

Ethics

1. God is the only object of man's perfect happiness.
2. Man is accountable to God for his human acts.
3. All men are obliged to render public worship to God.
4. Suicide is never allowed.
5. A lie is intrinsically evil.
6. Duelling is opposed to the Natural Law.
7. Under certain circumstances, it is lawful to kill an unjust aggressor.
8. Civil society has the right to inflict capital punishment.

Natural Sciences

Physics

1. Transmission of pressure in liquids. Pascal's law. Hydrostatic press. Downward, upward and lateral pressure. Equilibrium of liquids in communicating vessels. Archimedes' principle;—its application in determining the specific gravity of solids.
2. Properties of gases. The atmosphere and its pressure. Barometers. Mariotte's Law. The Air-pump. Lifting and force pumps. Siphon.
3. Production of statical electricity. Electroscope. Electrostatic induction. Electrophorus. Plate machine.
4. Current electricity. Primary batteries. Daniell's, gravity, and Leclanche cells. Electrical Units. Ohm's law. Galvanometer. Permanent and electromagnets.
5. Electromagnetic induction. Ruhmkorff's coil. Dynamo. Morse's Telegraph. Telephone.
6. Wave motion. Wave period. Wave length. Amplitude. Production and propagation of sound. Sound Waves. Intensity, pitch and timbre of musical sounds. Reinforcement and interference of sound.
7. Ordinary thermometers. Expansion of bodies by heat. Rate of gaseous expansion. Relation of temperature and volume of gases. Liquefaction and vaporization. Latent heat.

Mechanics

1. Motion and rest. Kinds of motion. Laws of uniform, and uniformly accelerated motion. Composition and resolution of uniform velocities.
2. Force. Kinds of force. Newton's laws of motion. Measurement of force.
3. Composition and resolution of angular forces acting in one plane. Equilibrium of forces. Triangle of forces. Trigonometrical relation between two forces and their resultant.
4. Simple Machines. General laws of machines. Lever. Wheel and Axle. Pulleys.

Astronomy

1. The Celestial Sphere. Its relation to the earth. Coördinates of a Star. Altitude and Azimuth, Right Ascension, Declination and N. P. distance of a star.
2. Diurnal motion of the earth. Sidereal, true and mean solar time. Local time.
3. Transit Instrument and Meridian Circle. Their use in determining the coördinates of a star.
4. Apparent motions of the planets. Their real motions. Copernican system. Kepler's laws. Universal Gravitation.
5. Solar system. Sun's Dimensions and Constitution. Description of the Planets.

General Chemistry

1. Chemical symbols and formulae. Molecular and atomic weights. Chemical equations. Quantivalence. Laws of definite and multiple proportions. Gravimetric computations.
2. Describe the elements H, O, N, Cl, S. Explain the manufacture of HCl, HNO_3, NH_3, H_2SO_4; and give the chief properties and uses of these compounds. Acids, bases, salts.
3. Occurrence, preparation, properties and uses of the various forms of Carbon. Illuminating gas.
4. Preparation, properties and uses of the compounds Na Cl, Na_2CO_3, Na OH, Ca O, Ca $(OH)_2$.
5. Cast Iron, wrought iron, steel. Preparation of these substances from the ores of iron.

TOTAL 501

Argument:

Nebuchodonosor, Ruler of the Chaldean Empire, commonly styled "King of Babylon," having twice captured Jerusalem, left Sedecias to rule over the Kingdom of Judah. This Prince, in the ninth year of his reign, resolved to free himself from the dominion of the Babylonian monarch. Jeremias the prophet is sent by God to dissuade Sedecias from his purpose. He foretells that Sedecias shall fall into the hands of Nebuchodonosor, but adds that "neither sword nor shaft nor spear shall ever fatal be to Judah's King." The misinterpretation of these prophetic words, on which hinges the plot of the tragedy, ultimately leads to the rebellion and all the misfortunes which eventually follow the overthrow of Sedecias. The Jewish capital is taken after a siege of two years and Sedecias with his two sons, Eliakim and Rablath, falls into the hands of Nebuchodonosor. Meanwhile, Josias, having escaped, saves the life of Elmero. Being persuaded by Manasses to disguise himself as his son, Josias seeks admission to Nebuchodonosor's presence, and, being about to be rewarded, begs that his only reward may be the pardon and safety of his father. The monarch, wishing to show his gratitude, but ignorant of the hidden meaning of the youth's request, swears that his father shall live. When informed of the deception practised upon him, Nebuchodonosor, exasperated beyond measure, but loath to prove himself faithless to his oath, vents his fury on the offspring of his unhappy victim, and Sedecias, the last King of Judah, beholds his children slaughtered by his side; he himself having his eyes torn out, is led with the rest of the inhabitants into captivity.

Acknowledgments

The President and Faculty wish to express publicly and in an especial manner the gratitude with which the College recalls and cherishes the memory of its past and present benefactors. The Messrs. Bernard, Patrick and Hugh McCloskey have at their own expense erected the Superb College Annex now occupied by the Primary Department. The Thomas J. Semmes Memorial Chapel is the Munificient Gift of a noble wife fittingly perpetuating the memory of her illustrious husband in the College he loved so well.

The College also desires to express its gratitude to Mrs. Jas. Denègre, Mr. J. B. Levert, Mr. Nicholas Burke, Mrs. N. Hanton Burke, Mr. Lawrence Fabacher, Mr. Joseph Burguières, Mr. Francis B. Johnson, Mrs. Andrews Johnson, Mr. James Sinnott, Mr. Anthony Vizard and other true friends who generously contributed to the building fund.

The College hopes that these noble examples will arouse in others, blessed with ample fortune, the desire to emulate the above-named donors and to advance the cause of Christian education by assisting in the construction of the contemplated Science Hall and other buildings forming an essential feature in the original plan.

The President and Faculty express their grateful acknowledgment also to the various departments of the U. S. Government and of the Smithsonian Institute for contributions to the College Library and Museum.

To Georgetown University, Washington, D. C., for one scholarship in the Law Department and for one in the Medical Department.

To Tulane University for two scholarships in the College of Technology.

To Hon. Adolph Meyer for the official records of the Union and Confederate Armies, and for many acts of courtesy and kindness.

To Gen. Allen Jumel and Major Frank Lobrano for many acts of courtesy.

To Mrs. James Denègre for a superb celestial and terrestrial globe.

To the Ursuline Academy for a selection of artistic lantern slides in color photography.

To Dr. William Schepppregrell and Dr. William R. Mandeville for the loan of superb lantern slides.

To Prof. Abraham L. Metz, M. D., for liquid air and other acts of kindness.

To Mr. W. H. Rowles for courtesy of Tulane Theatre.

To Mr. Russell Palmer for performing experiments with liquid air for students.

To Mr. E. M. Reynès for valuable works in Theology.

To Miss C. Reynès for two beautiful crucifixes and relic from the tomb of St. Francis Xavier.

To Mr. J. Beckwith for the following contributions to Physical Cabinet: Large Spectroscope, with Thollow prism, with bisulphide prism; Western Electric Company's Portable Testing Set and Wheatstone Bridge; Thermopile; large sheets of mica for condensers.

To the family of the late Dr. Thos. Layton for Western Union Telegraphic Relay and Aneroid Barometer.

To Rev. Thos. Delaney for a superb bust of Leo XIII.

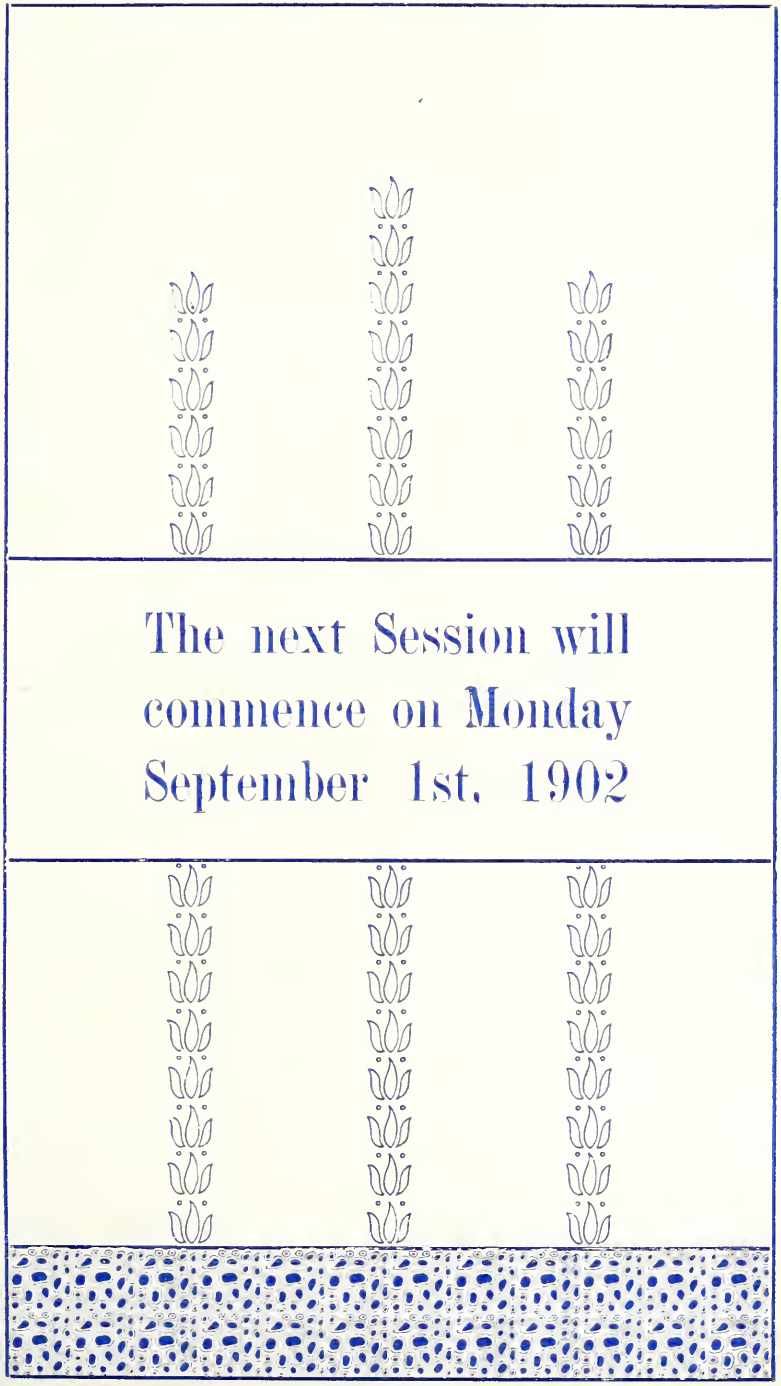
To Mr. E. Claudel for an assortment of artistically colored lantern slides.

To Miss M. Hobson for a precious souvenir from the Holy Land.

To the ladies of the Convent of the Good Shepherd for Mexican Curios.

To the local press for many acts of courtesy.

To Mrs. W. C. C. Claiborne for ancient silver medal of great value.



The next Session will
commence on Monday
September 1st, 1902
